

CE-label - EN 15824

General information about CE-label

Construction products which are linked to a standard is required by law since 1/6 2013, to have the right CE label in order to be sold within the EU.

The CE label is a reference to describe the products performance according to the CE standard. Our fillers have two CE labels, EN13963 suitable for jointing plasterboard walls and ceilings, and EN15824 suitable for finishing all kind of substrates. Our adhesives do not have a CE standard to comply to, so therefore no CE label is necessary.
